

Maitrek Patel

AI Engineer | Full Stack Developer | Himmatnagar, Gujarat, India

+91-9157161203 | maitrekpatel1612@gmail.com | GitHub | LinkedIn | Portfolio

EDUCATION

- **PDPM Indian Institute of Information Technology, Design and Manufacturing Jabalpur** 2022 - 2026
Bachelor of Technology (B.Tech) in Computer Science and Engineering | CPI: 7.2/10

WORK EXPERIENCE

- **MAQ Software** January 2026 - April 2026
Associate Software Engineer Noida, India
 - Optimized enterprise metadata dependency validation pipelines using Apache Polaris and Microsoft Fabric, reducing Capacity Unit (CU) consumption by **92%** across large-scale workloads.
 - Engineered Medallion Architecture optimization strategies using **Delta Lake, PySpark, Azure Fabric, and OneLake**, reducing operational infrastructure costs by over **\$12K annually**.
 - Resolved Delta Lake Reader Version compatibility issues by migrating enterprise datasets from Version 2 to Version 1, enabling Polaris interoperability with an additional **16% CU reduction**.
 - **Tech Stack:** Microsoft Fabric, Azure, Delta Lake, Apache Polaris, PySpark, Python, Spark SQL.

PROJECTS

- **Hive – Multi-Vendor E-Commerce SaaS Platform | GitHub | Deploy Link:** 2026
 - Architected a microservices-based SaaS platform with dedicated services for authentication, products, sellers, and orders.
 - Implemented event-driven communication using Kafka, API Gateway, and service registry, achieving horizontal scalability to process large number of orders daily with the power of caching using Redis to reduce load on API.
 - Integrated Stripe Connect for secure split payments, ImageKit for optimized media handling, and real-time analytics with WebSocket dashboards.
 - **Tech Stack:** Microservices, Express.js, Next.js, Kafka, Redis, MongoDB, Prisma, Docker, AWS, Firebase, WebSockets, CI/CD, Swagger API Docs, Nx, ImageKit.
- **Conexus – AI SaaS Automation Platform | GitHub | Deploy Link:** 2026
 - Engineered a scalable B2C SaaS platform from scratch enabling seamless automation workflows across Google Drive, Slack, Discord, and Notion.
 - Built a drag-and-drop node builder with infinite canvas and dynamic credit-based billing powered by Stripe subscriptions.
 - Delivered a production-ready solution with real-time event triggers, collaborative orchestration of services, and a polished responsive UI supporting light/dark mode.
 - **Tech Stack:** TypeScript, NextJs, Neon, NGrok, Bun, TailwindCSS, Stripe, Google APIs, Slack APIs, Discord APIs, Notion APIs, Aceternity UI.
- **Mentora – Learning Management System | GitHub | Deploy Link:** 2026
 - Developed a scalable Learning Management System with distinct educator (admin) and student views, enabling seamless role-based access and course management.
 - Integrated AWS S3 and CloudFront for reliable media storage and low-latency global content delivery.
 - Containerized backend services using Docker and deployed serverless functions via AWS Lambda and API Gateway, ensuring scalability and cost efficiency.
 - Implemented workflows including student enrollment, assignment handling, and payment integration with Stripe.
 - **Tech Stack:** Next.js, TypeScript, TailwindCSS, Node.js, Express.js, Docker, AWS (Lambda, API Gateway, DynamoDB, S3, CloudFront), Clerk, Vercel.

TECHNICAL SKILLS

- **Languages:** C/C++, TypeScript, Python, JavaScript, Java, HTML+CSS, Bash
- **Web Development Tools:** NodeJs, Cursor, Git, GitHub, Docker, Postman, Jest, Swagger API
- **Backend:** REST, GraphQL, Socket.io, gRPC, Redis, Kafka, Nginx, Distributed Systems, System Design
- **Cloud/Databases:** MongoDB, MySQL, PostgreSQL, Redis, AWS, Azure
- **AI/Automation Tools:** n8n, MCP, LangChain, LangGraph, LangSmith
- **DevOps:** Linux, Nginx, Docker, Kubernetes, GitHub Actions, Jenkins, Ansible, CI/CD Pipelines, Terraform
- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, OOPs, Software Engineering, Design Patterns
